Hi Donella,

The only concern we have is a possible increase in bird activity.. We ask that if this project moves forward, that there is a plan in place to mitigate any significantly increased bird activity (particularly seagulls) as a result of garbage disposal. Additional bird activity could pose increased hazard to aircraft on approach to Runway 27 at Sequim Valley Airport.

We have received a conditional use permit application for a Transfer and Recycling Station in the Carlsborg Urban Growth Area and are curious if the airport has any concerns with the proposal. Please provide comments by December 17th if you have concerns.
